33
34             <p>
35                 The Web Programming Foundations course introduces learners to
36                 the
37                 core technologies behind modern websites. It builds a strong
38                 base
39                 in HTML, CSS, and fundamental web concepts, preparing students
40                 for
41                 advanced frontend and backend development.
42             </p>
